

Syed Saim Haider

Date of birth: 20/11/2005 | **Nationality:** Pakistani | **Address:** Pakistan (Home)

EDUCATION AND TRAINING

07/08/2022 – 01/04/2026 Gujrat, Pakistan

BACHELORS OF INFORMATION TECHNOLOGY University of Gujrat

Core Coursework & Specialized Academic Focus:

- **Software Engineering:** Requirements engineering, clean code architecture, and agile software lifecycles.
- **Database Management Systems:** Relational database schema design, index optimization, and SQL transactional queries.
- **Web Development:** Full-stack architectures, client-server models, RESTful API design, and asynchronous programming workflows.
- **Object-Oriented Programming:** Domain modeling, SOLID design principles, inheritance, and clean encapsulation.

Key Applied Engineering Competencies:

- Full-stack systems architecture development using .NET and modern JavaScript ecosystems.
- Relational database modeling using Microsoft SQL Server and object-relational mapping tools.
- Implementation of testable, clean code principles following separation of concerns.

Level in EQF EQF level 6

WORK EXPERIENCE

SOFTWARE ENGINEER INTERN (.NET & ANGULAR) – KARMA SOFTWARE SOLUTIONS – 17/09/2026 – Current – LAHORE, PAKISTAN

- Contributed to the design and development of the Tasks & Issues module for "MaxOut CRM," a live, enterprise-grade project management and client ticketing platform.
- Built maintainable and testable backend RESTful API endpoints using ASP.NET Core MVC following a clean, layered architecture (Controllers, DTOs, Repository Pattern, and EF Core DbContext).
- Implemented real-time synchronization across connected users by integrating SignalR hubs, ensuring instant status, priority, and assignee updates without page reloads.
- Handled high-overhead operations and background processing by configuring Hangfire for recurring CRON-scheduled tasks and fire-and-forget background jobs, maintaining API response times under 50ms.
- Engineered responsive frontend architecture using Angular, utilizing Standalone Components, Lifecycle hooks, Route Guards (canActivate/canMatch), and Lazy Loading for modular performance.
- Developed reactive, performant user UI components using RxJS operators (debounceTime, switchMap) for search operations, and leveraged Angular Signals for optimized state management.

SKILLS

C# | Angular | .Net Core (Asp.Net Core) | .NET Core ASP.NET MVC | TypeScript | React JS/ React Native Basic

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user
